## JANUARY 9, 2023 BOARD MEETING STAFF REPORT

1. No comment

2.\* **AUTHORIZATION TO MEET VIA TELECONFERENCE**

A. Authorization to Meet Via Teleconference Pursuant to Government Code Section 54953, Subdivision (e)(1)(C) – Consider finding by a majority of vote under Government Code 54953 (e)(3) that, as result of the COVID-19 emergency, the meeting should be held by teleconference pursuant to Subdivision (e) of Section 54953 of the Government Code.

### **BACKGROUND AND STATUS:**

In light of the Governor’s declaration that a state of emergency exists due to the incidence and spread of the novel coronavirus, and the pandemic caused by the resulting disease COVID-19, the Board should consider whether meeting in person would present imminent risks to the health or safety of meeting attendees.

The Centers for Disease Control indicates that COVID-19 is a highly transmissible virus that is spread when an infected person breathes out droplets and very small particles that contain the virus, and such droplets and particles are breathed in by other people. Since June of 2021, a more infectious variant of the virus, known as the Delta Variant, has emerged and now accounts for the vast majority of COVID-19 cases. Since then other variants continue to emerge.

Although effective vaccines have been approved by the U.S. Food and Drug Administration for emergency use, vaccination rates are slow and have not yet reached a point to significantly control community transmission. As of December 29, 2022, 74.8 % of Californians are fully vaccinated.

Those who become infected with COVID-19 are at risk of serious illness and death. As of December 28, 2022, over 1.1M Americans have died from the virus. Many more have been hospitalized with serious illness. Currently, in Contra Costa County, there are 94 people hospitalized with COVID-19.

On September 20, 2021, the Contra Costa County Health Officer issued recommendations for safely holding public meetings that include recommended measures to promote social distancing. Among the Health Officer’s recommendations, online (teleconferencing) meetings are strongly recommended as those meetings present the lowest risk of transmission of SARS-CoV-2, the virus that causes COVID-19. Having the option to attend the meetings by teleconference would directly reduce the risk of transmission among meeting attendees, including members of the public and agency staff, which has the ancillary effect of reducing risk of serious illness and death as well as reducing community spread of the virus.

In order to accommodate the requests from some Trustees who desire to attend in-person, the District is opening the Board room for a limited number of Trustees to participate in-person. Trustees may attend in-person if they wish to do so, while others may continue to participate remotely. The District has documented the vaccination status of Trustees and a pre-meeting health screening checklist for in person attendees will also be required. The number of in-person attendees will also be limited to ensure appropriate social distancing is maintained per County Health Officer recommendations. Since these measures are not practically enforceable for public attendees and allowing public attendees would make contact tracing (in the event of an attendee's testing positive for the virus) impossible, the Boardroom will remain closed to the public at this time.

If the authorization to meet by teleconference is not approved by a majority vote, then the meeting will adjourn after this item and the remaining agenda items will be rescheduled to a future in-person meeting.

**Recommendation** - Move that the Board finds that, as a result of the COVID-19 emergency, meeting in person would present imminent risks to the health or safety of attendees, and the meeting should be held by teleconference as authorized by Subdivision (e) of Section 54943 of the Government Code.

## December 2022 Mosquito and Arbovirus Surveillance Report

Updated December 27<sup>th</sup> by Steve Schutz, Ph.D., Scientific Programs Manager

**Human cases:** As of December 27<sup>th</sup>, 160 human cases of West Nile virus had been reported in California in 2022. One confirmed case (fatality) was reported in Contra Costa County (Discovery Bay). Patient's primary residence was outside the County so the case was initially not officially attributed to CCC.

**Horses:** Sixteen equine cases of WNV have been reported statewide. An effective vaccine is available for horses; most affected horses have been unvaccinated.

**Dead birds:** As of December 27<sup>th</sup> 373 dead birds had been reported, 38 birds were submitted for testing, (blue icons on map), and one was confirmed positive for WNV (Discovery Bay, May red icon on map). The statewide hotline is currently closed for the season but online dead bird reports are encouraged year-round at <https://westnile.ca.gov/report>

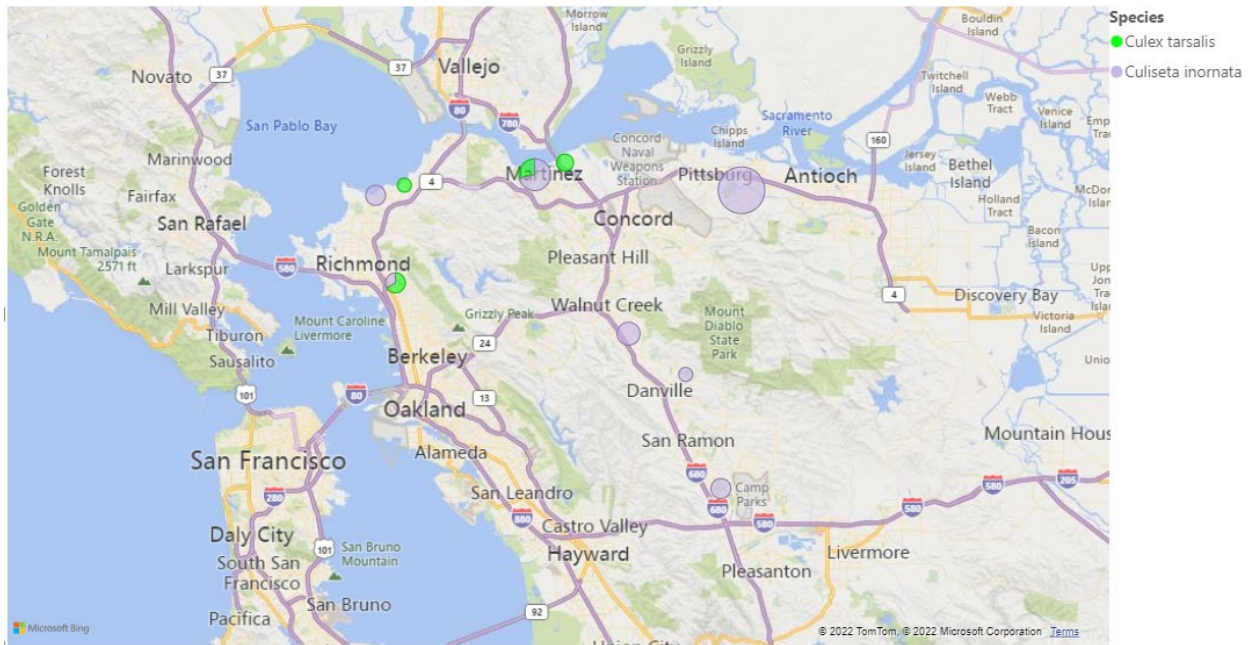

**Light trap counts:** Twenty-two traps are currently being operated daily year-round, with collections made weekly by field technicians. Countywide *Culex tarsalis* and *Culex pipiens* counts are currently below average. Note: 2 collection weeks were skipped in August due to *Aedes aegypti* response.

*Culex tarsalis* counts (red) vs. 5 year average

*Culex pipiens* counts (red) vs. 5 year average

Map showing light trap locations and relative average species counts from December 1<sup>st</sup> - 27<sup>th</sup>

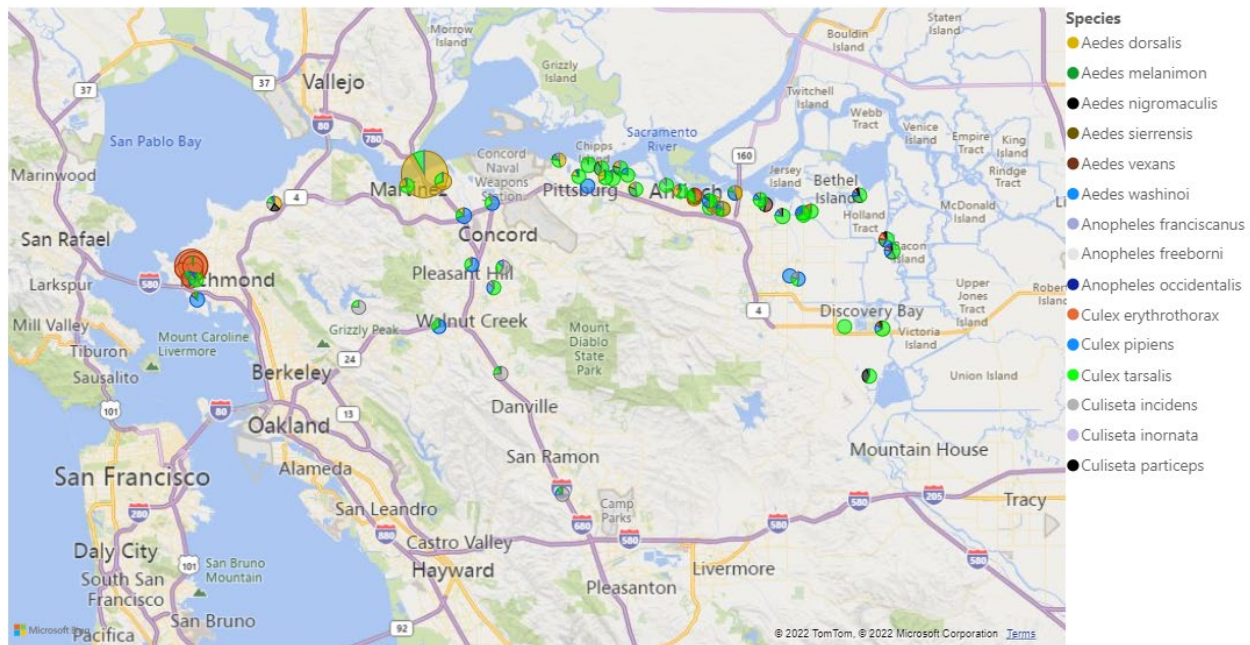

**CO<sub>2</sub> traps:** Weekly CO<sub>2</sub> trapping has been suspended for the season. Trap counts for *Culex tarsalis* were mostly below average, while *Culex pipiens* counts were somewhat above average for much of the season. Unusually high *Aedes dorsalis* counts in waterfront areas followed peak high tides and adult mosquito control operations were conducted. These unusually high counts may be due to changes in salinity of marshlands due to low rainfall, in addition to intermittent access restrictions to some critical sites in coastal areas. Wetland areas on the Chevron Refinery in Richmond also produced high numbers of *Culex erythrothorax* in October.

*Culex tarsalis* counts (red) vs. 5 year average

*Culex pipiens* counts (red) vs. 5 year average

Map showing CO<sub>2</sub> trap locations and relative average species counts May through October (note: map includes traps set at 'random' sites in Richmond and Antioch/Oakley in October in addition to the normal 23 fixed surveillance sites).

**Mosquito testing:** 307 pooled samples were tested in 2022, two were positive for WNV (7/25, *Culex tarsalis*, Oakley; 8/8, *Culex pipiens*, Palm Tract-Orwood).

**Larval samples:** Lab staff continues to process larval samples collected by field employees daily, year-round.

## Larval Count by Species

Map showing larval sample locations and relative species counts, December 1<sup>st</sup>-27<sup>th</sup> 2022.

**Sentinel chickens:** Five of six chickens from our flock at Holland Tract (Knightsen) tested positive for WNV antibodies, sample dates 8/22, 9/6 and 9/19. All four sentinel flocks were discontinued for the season as of October 10<sup>th</sup>.

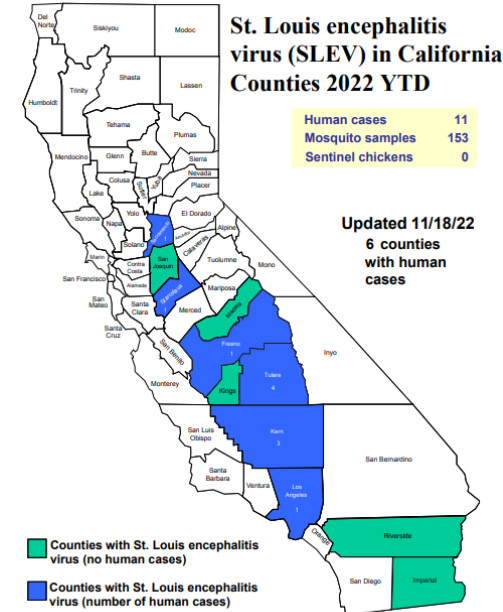

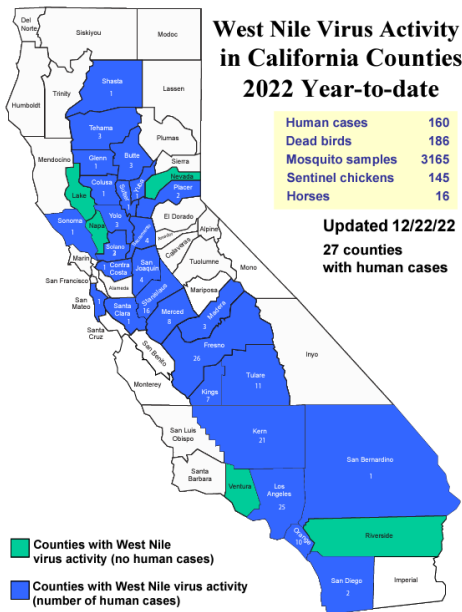

**Other projects:** Lab staff has collected ticks for CDPH, University of California and University of Nevada-Reno projects on *Rickettsia* and has also provided *Culicoides* (biting midges) to a researcher at UC Riverside studying the distribution of species in California. We are also continuing to work with Leading Edge staff on troubleshooting and refining the MapVision database and field software. Our Scientific Programs Manager completed a revision of the

identification guide to Mosquitoes of California for the MVCAC, to include larvae and adults of invasive *Aedes* species, which has been made available online to all member agencies. The MVCAC Lab Technologies Committee is currently collecting high-resolution photographs of key characteristics of California mosquito species from vector control districts statewide, for eventual inclusion in a shared MVCAC photographic library and will also be collecting photographs of other pest/vector species.

**Weather conditions:** Current average overnight low temperatures are below the 55 degree incubation threshold for West Nile virus transmission.

**Regional:** Through December 27<sup>th</sup>, West Nile virus activity had been detected in Contra Costa (1 human case, 1 positive dead bird, 2 mosquito samples, five sentinel chickens), Sacramento, Solano, Santa Clara, Yolo, Napa and San Joaquin Counties, with human cases reported in Contra Costa, Yolo, Solano, San Joaquin, Sonoma and Santa Clara Counties.

**Statewide:** 160 human cases of WNV have been reported statewide (see map below). 3,165 WNV positive mosquito samples, 186 positive dead birds and 145 positive sentinel chickens have been reported this year through December 27<sup>th</sup>. In addition, 153 mosquito samples have tested SLE (Saint Louis Encephalitis) positive (including one in San Joaquin County) and 11 human cases were reported in Sacramento, Stanislaus, Fresno, Kern, Tulare and Los Angeles County. For the year, California was above the 5-year average in terms of WNV positive mosquito samples but below average in all other categories.

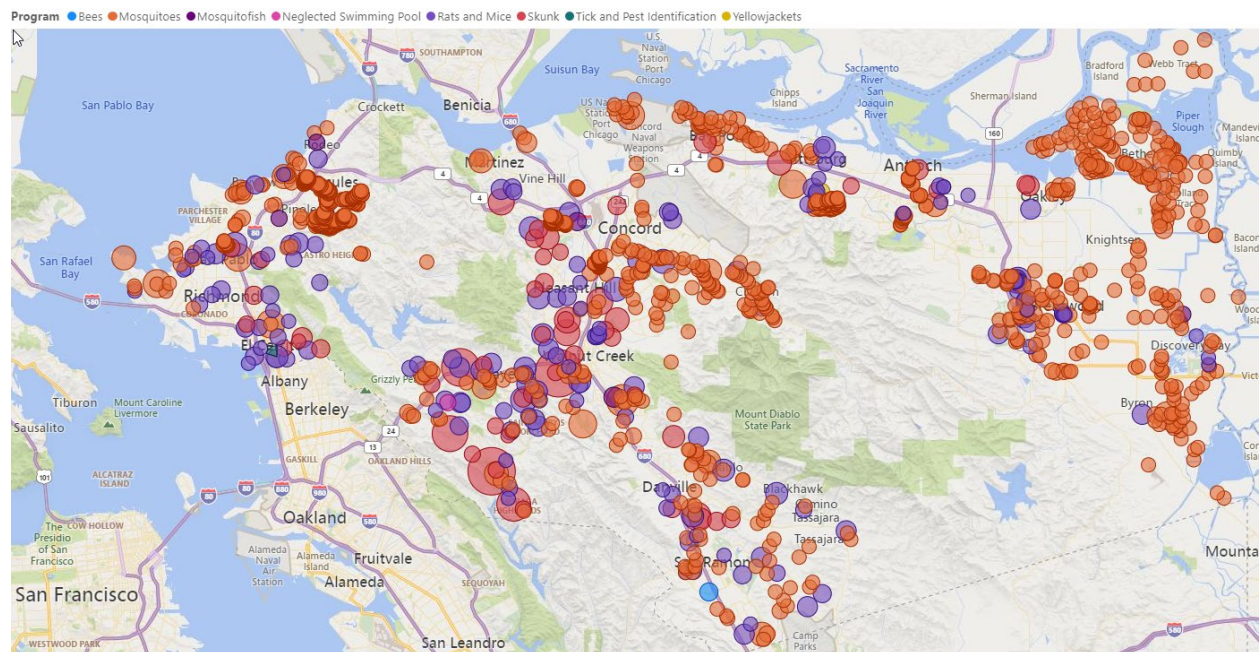

## December 2022 Operations Report

Prepared on December 1, 2022, by David Wexler, Terry Davis, and Jeremy Shannon,  
Program Supervisors

### General:

Field staff have begun working on various winter projects, including cleaning and repairing equipment, various facility maintenance projects, disposal of old equipment and hazardous materials, such as used oil, old batteries, paint, and spent lightbulbs, and preparing vehicles for sale. Field staff that have moved zones are becoming familiar with their new geographic areas of responsibility and working on updating source maps. New employees will continue to prepare for the next round of CDPH technician certification examinations to be held in May 2023.

### Dead Birds:

In December 2022 we had 0 dead bird service requests, the same received in December 2021. The Dead Bird hotline shut down for the season on October 14, though submissions can still be made online. Year to date, one bird collected 5/4/22 in Brentwood (American crow) has tested positive for West Nile virus.

## Mosquitoes:

With the cooler weather, mosquito activity has steadily decreased and will likely continue to remain low until temperatures warm up in the spring of 2023.

In December 2022 there were a total of 1 mosquito service request and 5 requests for mosquitofish, fairly similar to December 2021 when we received 4 service requests for mosquitoes and 9 for mosquitofish. In addition to service requests, technicians and inspectors recorded 611 inspection activities, and 36 larval surveillance actions, and collected 89 adult trap samples. Field staff recorded 2 site treatments during this time to address mosquito production. With recent rains, many inspections have been performed by technicians becoming familiar with their zone and evaluating rainwater retention patterns and potential breeding sites.

### Mosquito Program Actions 12/1/22-12/29/22

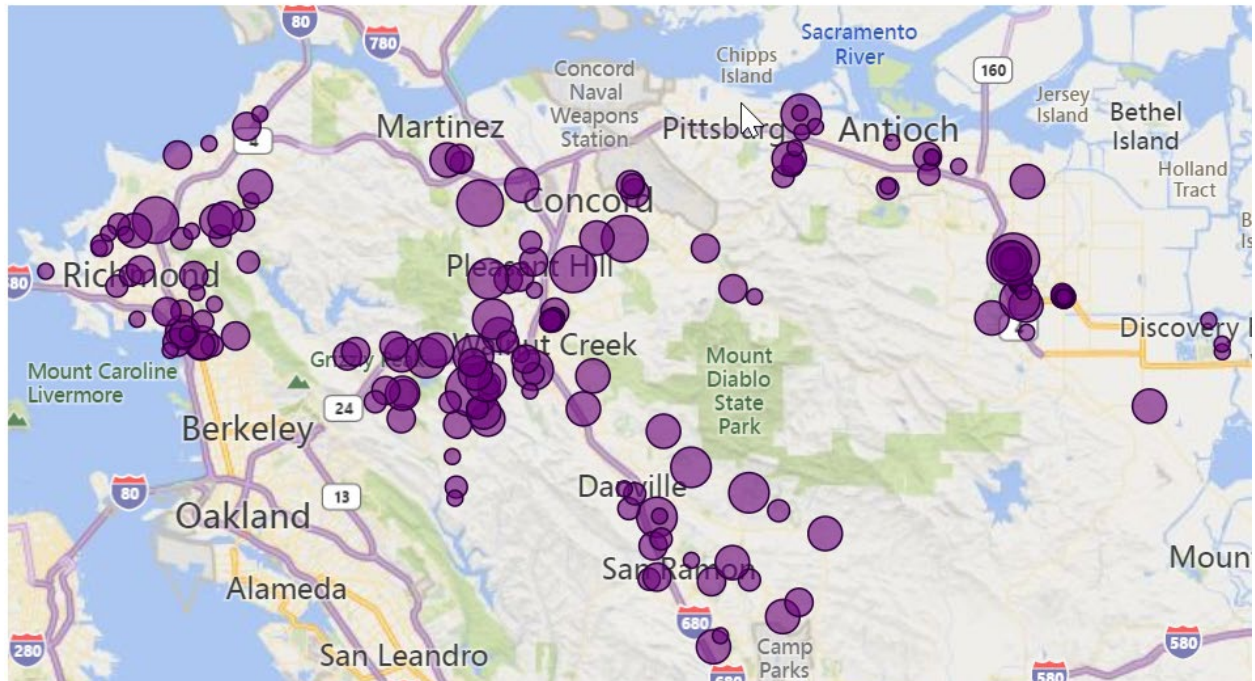

## Rodents:

In December 2022 we completed 88 requests for service for rats and mice, an increase of 54% compared to the 57 we received in December 2021. Rodent inspection training continues in the field with individual inspectors as needed, focusing on new technicians gaining experience performing inspections. In addition to service requests, technicians and inspectors recorded 102 inspection activities and continue to evaluate sites within their geographic boundaries for future monitoring and baiting activities.

Rodent Program Actions 12/1/22-12/29/22

Program ● Rats and Mice

## Skunks:

The District received 34 service requests for skunks in December 2022, a slight increase from the 30 we received in December 2021. 48 inspection activities were recorded and 6 skunks were picked up in December 2022, whereas 26 inspections and 13 skunk pickups were recorded in December 2021.

Skunk Program Actions 12/1/22-12/29/22

Program ● Skunk

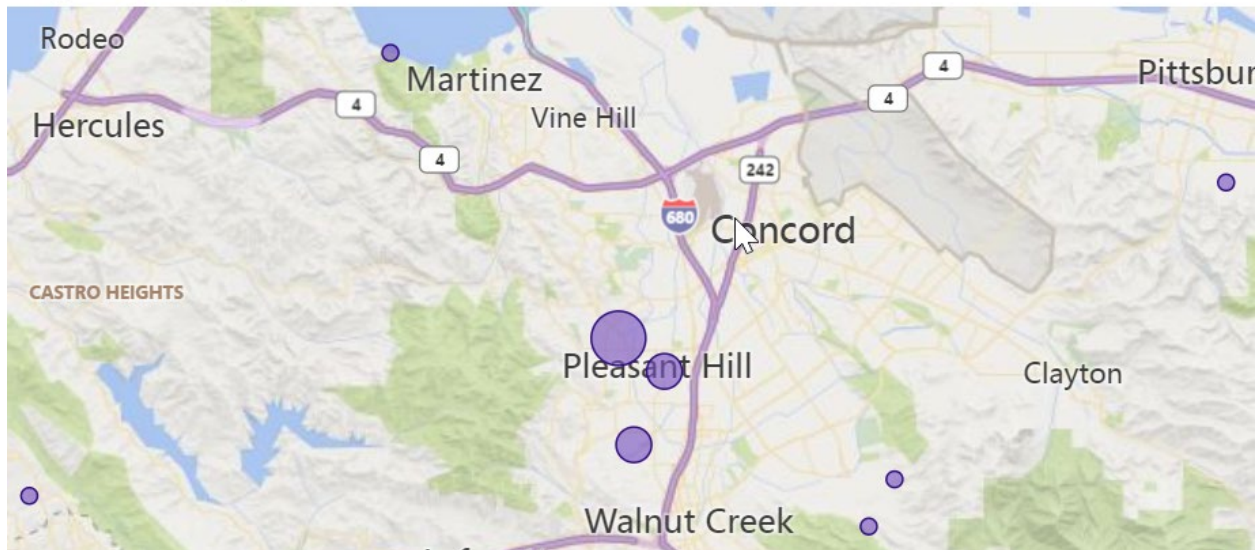

**Yellowjackets:**

We received 2 requests in December 2022 (1 warranted treatment), a significant drop from the 5 requests received in December 2021, with 6 treatments at that time. The recent cold temperatures will have stopped yellowjacket activity for the remainder of the year. Wet soil conditions do not allow us to make treatments for in-ground yellowjackets nests as the product will not be effective.

## Yellowjacket Actions 12/1/22-1/29/22

Program ● Yellowjackets

### Facility Report:

- Electrical repairs were made to several locations in preparation for the installation of an improved security system.
- 3 vehicles were disposed of
- Reviewing quotes to have the second-story windows resealed

## Website Statistics

Due to the newly implemented Google Analytics, the appearance of statistics has changed. Also, we are no longer able to do a comparison of 2021 to 2022 due to the recent Google Analytics update which erased all previous data. Lastly, there appears to be an issue regarding the Top 10 Pages report in the new version of Analytics. For now, we've replaced that statistic with information pertaining to "How Visitors Get to Our Site," which can be more relevant, particularly with the implementation of the District's Facebook and Nextdoor pages as ways to direct people to our website.
