

December 2023 Update – We participated in a meeting with the State Water Resources and Control Board. Their plan is to have districts submit applications for a new permit next year. Timeline will need to be adjusted to reflect their timeline once that is determined.

#4. Building expansion and upgrade

Expected Timeline – starting 1-2023

July 2023 Update – An ad-Hoc committee of the Board was formed to provide oversight and collaborate with staff on the building remodel project. The committee met in April 2023 to start discussing the project scope and expected timelines. Since then, staff has worked on compiling a list of needed and wanted improvements, and has contacted a consulting company to talk about planning, project management and oversight.

December 2023 Update – The ad-Hoc committee has been busy in the second part of 2023. A Request for Qualifications for a Project Management firm was issued in August, proposals were submitted and firms were interviewed by the committee in October. The Board approved the agreement with CPM at the November 2023 meeting. The committee subsequently met with CPM to refine the scope of work and determine the next steps.
